# Do Your Part, Be SepticSmart:

## The Do's and Don'ts of Your Septic System

Learn these simple steps to protect your home, health, environment and property value:

### Protect It and Inspect It:

#### Do:

- Have your system inspected (in general) every three years by a licensed contractor and have the tank pumped, when necessary, generally every three to five years.

### Think at the Sink:

#### Don't:

- Pour cooking grease or oil down the sink or toilet.
- Rinse coffee grounds into the sink.
- Pour household chemicals down the sink or flush them.

#### Do:

- Eliminate or limit the use of a garbage disposal.
- Properly dispose of coffee grounds & food.
- Put grease in a container to harden before discarding in the trash.

### Don't Overload the Commode:

#### Don't:

- Flush non-degradable products or chemicals, such as feminine hygiene products, condoms, dental floss, diapers, cigarette butts, cat litter, paper towels, pharmaceuticals.

#### Do:

- Dispose of these items in the trash can!

### Shield Your Field:

#### Don't:

- Park or drive on your drainfield. The weight can damage the drain lines.
- Plant trees or shrubs too close to your drainfield, roots can grow into your system and clog it.

#### Do:

- Consult a septic service professional to advise you of the proper distance for planting trees and shrubs, depending on your septic tank location.

### Don't Strain Your Drain:

#### Don't

- Concentrate your water use by using your dishwasher, shower, washing machine, and toilet at the same time. All that extra water can really strain your septic system.

#### Do:

- Stagger the use of water-generating appliances. This can be helpful especially if your system has not been pumped in a long time.
- Become more water efficient by fixing plumbing leaks and consider installing bathroom and kitchen faucet aerators and water-efficient products.

# Homeowner Septic System Checklist

## Septic System Description

Contact your local authority if you don't have this information.

Date system installed \_\_\_\_\_

Installer \_\_\_\_\_

Phone \_\_\_\_\_

Tank size \_\_\_\_\_ gallons

Capacity \_\_\_\_\_ bedrooms

Type  conventional

alternative (type) \_\_\_\_\_

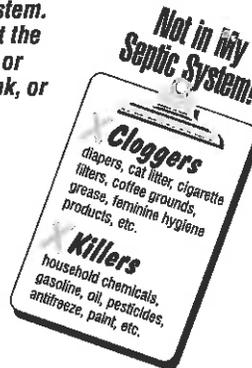

## Things to keep in mind:

- ✓ Regularly inspect your system and pump your tank as necessary.
- ✓ Use water efficiently.
- ✓ Don't dispose of household hazardous wastes in sinks and toilets.
- ✓ Plant only grass over and near your septic system. Roots from nearby trees or shrubs might clog and damage the drainfield.
- ✓ Don't drive or park vehicles on any part of your septic system. Doing so can compact the soil in your drainfield or damage the pipes, tank, or other septic system components.
